

*A well-stocked first-aid kit, kept within easy reach, is a necessity in every home.*

*Having supplies gathered ahead of time will help you handle an emergency at a moment's notice.*

***You should keep one first-aid kit in your home and one in each car.***

*Also be sure to bring a first-aid kit on family vacations.*

*Choose containers for your kits that are roomy, durable, easy to carry, and simple to open.*

*Plastic tackle boxes or containers for storing art supplies are ideal, since they're lightweight, have handles, and offer a lot of space.*

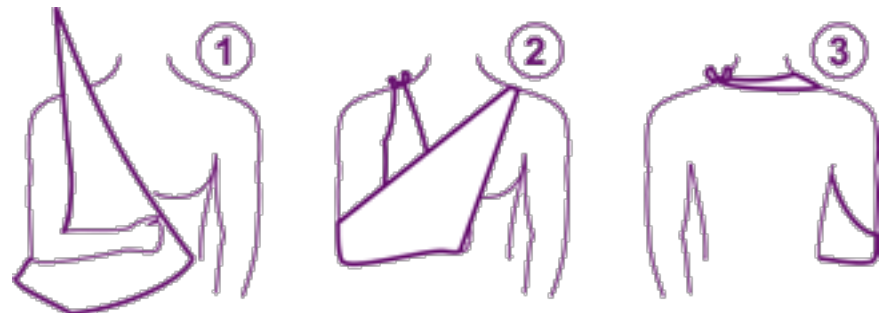

# Dressings & Bandages

A dressing is designed to be in direct contact with the wound, which makes it different from a bandage, which is primarily used to hold a dressing in place.

A bandage is a piece of material used either to provide support (for a dressing or splint), or to apply pressure (to slow the flow of blood)
